

# How to Remove Borders from Tables

### Appendix A: Glossary of Terms

Anthropology	Simply the best discipline in all the social sciences.
Archaeology	One of the subfields of anthropology. The one where everyone digs in the dirt.
Biological Anthropology	The subfield in which Cynthia Clarke was trained.
Cultural Anthropology	The focus of this course.
Linguistic Anthropology	The subfield of anthropology which is least often studied by anthropology students, but which is a fascinating topic.

So you have typed your vocabulary words into the table, but want to remove the border.

Appendix A: Glossary of Terms

Anthropology	Simply the best discipline in all the social sciences.
Archaeology	One of the subfields of anthropology. The one where everyone digs in the dirt.
Biological Anthropology	The subfield in which Cynthia Clarke was trained.
Cultural Anthropology	The focus of this course.
Linguistic Anthropology	The subfield of anthropology which is least often studied by anthropology students, but which is a fascinating topic.

Highlight the entire table . You can use this button or simply scroll over the table in the same manner as you would highlight text.

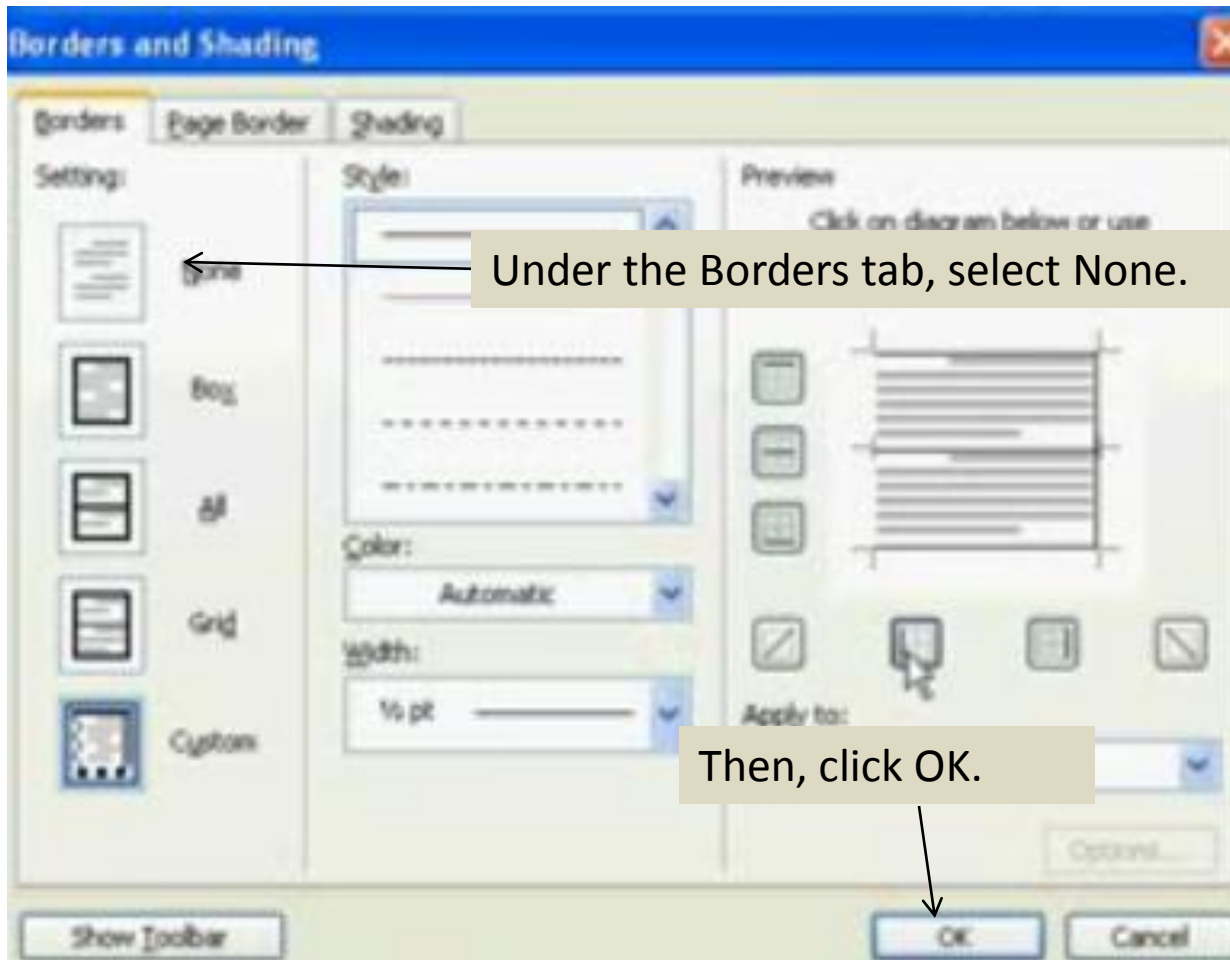

Click on the Table button here.

Next, select Table Properties.

Click on the Table tab here.

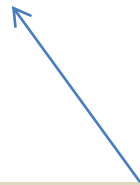

Next, click on the Borders and Shading button.

#### Appendix A: Glossary of Terms

Anthropology	Simply the best discipline in all the social sciences.
Archaeology	One of the subfields of anthropology. The one where everyone digs in the dirt.
